

## DIVERSITY

With our long experience and policy of agreement with our clients, we offer tall back bar counters with very interesting options for this kind of product such as glass doors with interior light, coffee hopper or remote unit.

- All the elements for an easier cleaning of our appliances are included as standard: gaskets that are easy to replace, removable fixing supports, hygienic moulded liner base, radiused corners and an integrated cleaning drains.
- As it is 1045 mm high, the tall back bar counter is the ideal element to be combined with out coffee unit counters and shelf counters.

## RELIABILITY

- Guaranteed reliability thanks to the use of high quality components, low consumption compressors, and the optimisation of electronic control parameters checked in our laboratories.

R-134a refrigerant.

High quality austenitic stainless steel interior and exterior.

Injected polyurethane insulation with 40kg/m3 density.

Rounded corners inside and on the worktop.

100 mm higienic splashback.

Copper tube evaporator and aluminium fins with anti-corrosion coating.

Electronic and digital control system of temperature and defrost.

Automatic evaporation of defrosting water.
